

Paris paris paris paris paris

At five words per minute, 5 Paris words, plus space after the last Paris, will take one minute. Now a sentence, with some punctuation and numbers, which is everything you need to know for the Morse test.

The quick brown fox jumped over the lazy dog. / ? , 0 1 2 3 4 5 6 7 8 9

Now here is some text to practice at the test speed.

The K7RA Solar Update for 12/20/2019

Still no sunspots, and it has been the same for 37 consecutive days.

Geomagnetic conditions remained quiet, until a minor stream of solar wind, according to the Spaceweather site, hit us on December 18. This drove the planetary A index to 13 from the low single digit values earlier in the week.

Average planetary A index for December 12 to 18 rose to 4.6, from 3.7 over the previous 7 days, while the middle latitude A index increased from 1.9 to 4.

Predicted solar flux over the next 45 days is 70, and we have seen this same daily 45 day flux forecast since December 2. December 1 was the last time there was any value in the forecast other than 70 when they predicted 69 for December 23 through January 4. The forecast is updated daily.

Predicted planetary A index from the same forecast is 8 on December 20 and 21, 5 on December 22 through January 4, 8 on January 5, 5 on January 6 to 8, 8 on January 9 and 10, 5 on January 11 to 13, 12 on January 14, 10 on January 15 to 17, 5 on January 18 to 31, 8 on February 1, and 5 on February 2.
